Document 1: JP 10-25288 A (Shimadzu Corp.), 27 January  
1998

Claims 1-12

The inventions set forth in claims 1-12 involve an inventive step relative to document 1, cited in the international search report.

Document 1 does not disclose ring-opening polymerization of a cyclic ester containing a proton source compound containing more than 80 ppm moisture as an initiator and molecular weight regulating agent, using the total proton concentration in the cyclic ester as an index, and incorporation of a carboxy-blocking agent into the resultant aliphatic polyester; and due to this feature, the inventions in the present application offer the advantageous effect that it is possible to control the molecular weight of the aliphatic polyester that is produced.
